# RECARO KIDS

«With more than one century of **engineering expertise** in seats from the **automotive and airplane** industries, RECARO Kids is the car seat maker which offers high safety standards to your children and durability, thanks to the combination of high-quality materials and ingenious design. We improve the performance for people in motion like no other – from childhood on.

For years, the products have been **awarded** prestigious design prizes by expert juries and have been convincing in tests by ADAC and Stiftung Warentest in terms of safety. Well thought-out solutions that last.

SMART SOLUTIONS THAT LAST OVER TIME. THIS IS OUR PHILOSOPHY, THIS IS INGENIOUS DESIGN.

What can we do today to make life easier for parents tomorrow? It's the question we ask ourselves on a daily basis when we set to work. We have been moving people **for over a century** so we know the importance of the **ergonomic** sitting position. Our engineering approach allows us to create products that are practical and smart for parents and safe and comfortable for children. Our focus on ergonomics means we give children the best possible ride every time, without compromising the **maximum safety** and great looks of our infant carriers, reboarders, child seats, buggies and strollers.»

# BRAND VALUES

## Quality

We believe quality is not just about doing things well, it's about nothing less than the best. Even though we don't work to win awards, but only to pursue the utmost safety and best designs, we are still proud when our products receive prestigious category awards as many have done. This is indeed confirmation of how committed we are to achieving our goals.

## Safety

When it comes to safety, we never compromise. The safety of our infant carriers and child seats is no exception. To consistently improve and generate new insights we work together with renowned testing institutes such as DEKRA, TÜV in Germany, TASS in the Netherlands and many other partners worldwide.

## Ingenious Design

When smart thinking and premium craftsmanship come together, the natural outcome is ingenious design. Design is nothing without functionality. And this is the challenge we set ourselves, to create what we call ingenious design: an approach which ensures products of the highest aesthetic standards, conceived to provide smart and simple solutions for your daily routine. Design and functionality are two sides of the same coin.

# SUSTAINABILITY

The concept of safety has expanded because it's not just our children who deserve protection. We also care about the conditions of the planet we will hand over to them. That's why we think sustainability is such an important issue. We contribute to the sustainable protection of the environment and thus also of your loved ones!

## Long Product Life Span & Modularity

Sustainability is based on smart ideas: That's what we had in mind when we developed our modular system. For example, the Avan/Kio Base can be used efficiently for both the infant carrier Avan and the reboarder Kio. Or the Sadena and Celona strollers - with the cleverly designed 4-in-1 Travel System - which are based on the same attachment to which various individual single units can be fitted.

# SUSTAINABILITY

## Premium Quality

Sustainability is also based on quality, as special attention to the production process can preserve resources, so can the choice of materials be also important for creating environmentally friendly products that last over time. Durable materials, ingenious technologies and the most stringent tests: we at RECARO Kids leave nothing to chance.

## Recycled Fabrics

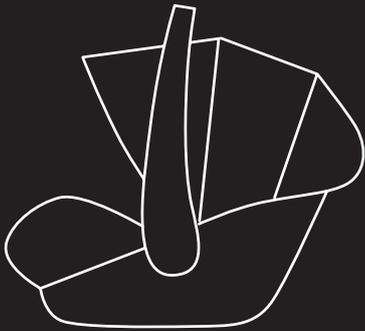

Millions of plastic bottles are thrown away every day and a lot of waste is produced that pollutes the environment. At the same time, the discarded bottles can be recycled and processed in an environmentally friendly way. In cooperation with Waste2Wear we make our contribution and use fabrics made from recycled PET bottles for most of our child seats. These recycled fabrics consist of at least 70% recycled material.

## Packaging

But caring for the planet in our design thinking goes further than the product itself. We work with as little packaging as possible and with recycled materials. And once the product is unpacked, the box can still be used for crafts.

CAR SEATS

BABY

Birth - 15 months

TODDLER

9 months - 4 years

CHILD

3.5 - 12 years

# MODULAR SYSTEM

For your today, and their tomorrow.

You should never change a winning team, and with our modular system you don't have to. Both the infant carrier Avan and the reboarder Kio boast a practical, modular system and a base that can stay in the vehicle for as long as it's needed. Using the Avan / Kio Base, both child seats can be quickly and firmly installed in your car with just one click - comfort is nothing without practicality. From birth to a height of 83 cm (about 15 months), the infant carrier Avan can only be used rear-facing, while you can use the reboarder Kio for your child from a height of 60 cm (about 3 months) or, with the additionally available newborn inlay, right from birth. We recommend using the reboarder rear-facing for as long as possible – if possible up to a height of 105 cm or about 4 years of age. Once your little one is 16 months old, you can also use the reboarder forward facing. For safe journeys – both long and short – as your child grows.

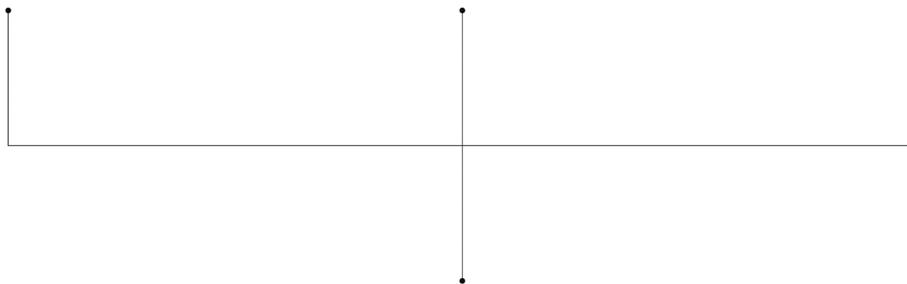

**AVAN**  
Birth – 15 months

**KIO + Newborn inlay**  
Birth – 4 years

**KIO**  
3 months – 4 years

**AVAN / KIO Base**  
Birth – 4 years

# AVAN / KIO BASE

## The safe combination.

Sometimes you don't need to take another road to travel far. The Avan / Kio Base is the key element that allows you to switch easily from the Avan infant carrier to the Kio reboarder and thus provides effortless travel up to when your child is 4 years old. Your child grows and your habits may change, but your way of travelling with them does not. The i-Size base with ISOFIX connectors offers maximum safety. The one-click installation easily secures the child seat to the base in the vehicle and the visible indicators show you whether everything has been correctly installed. You're ready to go.

### Modular system

The Avan/Kio Base can be used as a modular system in combination with the infant carrier Avan and the reboarder Kio

### ISOFIX connection

Ensures secure installation in the vehicle

### Indicators on the base

Shows you at a glance if everything is installed correctly with a green light

### Rebound bar

Absorbs energy in the event of a collision

### One-click installation with ISOFIX

Easy and secure one-click installation of the ISOFIX base without the vehicle's seat belt

### Adjustable support leg

Easy to adjust in the vehicle it improves stability

## TECHNICAL DETAILS

Standard: UN R129/03 (i-Size)

External Dimensions (W/D/H): 35.5 / 65 / 35 – 86 cm

Weight: 7.5 kg

# AVAN

Your very first step

## Comfort seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

## Newborn inlay

The newborn inlay provides your baby with a flat and ergonomic reclining position

## Patented HERO safety system

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping and simplifies the secure and easy fastening process

## Flexible operation

Can be fastened in place with the vehicle's seat belt or using the i-Size base with just a single click

## Ergonomic carry handle

An optimized shape of the handle allows ergonomic carrying and can be adjusted to multiple positions

## i-Size

Rear-facing transport in accordance with UN R129 for maximum safety

## Advanced Side Protection (ASP)

Integrated protectors absorb the energy in the event of a side collision

## Height-adjustable headrest with integrated harness

Offers simple, individual adjustment for the growing child thereby providing them with an ergonomic sitting position

## 3-point harness system

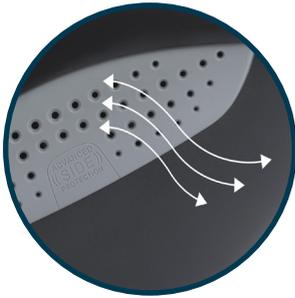

The intuitive, central harness adjuster with HERO harness guide enables the child to be fastened into the seat securely and simply

## Coated belt tongues

Reduces heating up in hot weather – thus preventing your baby's sensitive skin from getting hurt

# AVAN

## THAT'S WHY

### AIR VENTILATION SYSTEM

Thanks to openings in the outer shell and mesh inserts in the seat cover, a continuous flow of air ensures particularly comfortable sitting.

### LIGHTWEIGHT

Weighing just 4.1 kg, the Avan infant carrier is perfect for everyday use: light enough to carry throughout the day, from home to the car and vice versa, with no loss of safety.

### SMART HARNESS BUCKLE

When the baby is taken out of the carrier, the harness buckle tilts forward and stays in this position. Thus, the baby does not sit on the buckle when being placed in the carrier.

### TRAVEL SYSTEM

Our special adapters let you quickly fit the Avan to RECARO strollers and buggies, creating a seamless Travel System for moving around with your baby.

### EXTRA LARGE SUN CANOPY

The extra large sun canopy with UPF 50 sun protection and the extendable sun visor protect your child's sensitive skin from wind and UV radiation. In any season and in any weather.

### MODULAR SYSTEM

The Avan infant carrier can be installed on the Avan / Kio Base, in just a single click. The Base can be used in combination with the Kio reboarder as the child gets bigger, up to the age of approx. 4 years.

# SALIA 125

The convenient  
safety expert

## 5-point harness system

The intuitive and central harness adjuster enables the child to be fastened into the seat securely and simply

## One-handed adjustment

One-handed operation allows for a comfortable and flat resting position during the journey, facing away from the direction of traffic (5 positions)

## Newborn inlay

The variable newborn inlay for the infant carrier provides your baby with a flat and ergonomic reclining position

## Air ventilation system

The passive air ventilation system makes extended sitting particularly comfortable while travelling

## Memory foam in the headrest

Comfortable for the child and particularly suitable to absorb the forces generated in the event of an impact or collision.

## Height-adjustable headrest with integrated harness

Offers simple, individual adjustment for the growing child, thus providing them with an ergonomic sitting position

## Comfort seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

## Patented HERO safety system

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping and simplifies the secure and easy fastening process

## Storable support leg

Easy to adjust it improves stability and can be easily stored in the base when not in use

## 360° rotation

This relieves the parents' backs when inserting and removing the child and brings the child into the optimum sitting position

# SALIA 125

## THAT'S WHY

### LONG USAGE PERIOD

The Salia 125 impresses with a long period of use - suitable for newborns up to seven year old toddlers (40 – 125 cm). The height-adjustable headrest adapts perfectly to the height of the children and automatically grows as they do. The included comfort inlay provides protection and cosiness even for the smallest ones.

### 360 DEGREE ROTATION

The seat can be easily rotated 360 degrees. So you can quickly strap the child and then turn the seat back to its original required driving position.

### AIR VENTILATION SYSTEM

Thanks to openings in the outer shell and mesh inserts in the seat cover, a continuous flow of air ensures particularly comfortable sitting.

### INTUITIVE INSTALLATION

The use of ISOFIX and load leg makes installation simple and ensures a stable and secure positioning of the child seat in the car. The three anchorage points keep the seat in position and absorb the energies acting on the child in the event of an accident.

### ONE-HANDED RECLINE

The seat has five recline positions. Whether the child is strapped with the integrated harness system or with the vehicle seat belt. The recline can be adjusted with only a single hand.

### ADVANCED SIDE PROTECTION

Simply fold out the integrated ASP protectors on the door side. In the event of a side collision, the energy absorbers reduce the force that would act upon the child.

# SALIA 125 KID

The perfect  
follow-up  
seat

## 5-point harness system

The intuitive and central harness adjuster enables the child to be fastened into the seat securely and simply

## One-handed adjustment

One-handed operation allows for a comfortable and at resting position during the journey, facing away from the direction of traffic (5 positions)

## Air ventilation system

The passive air ventilation system makes extended sitting particularly comfortable while travelling

## Patented HERO safety system

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping and simplifies the secure and easy fastening process

## Integrated harness storage

Easy conversion for use from 100 cm due to integrated harness storage, without the need to expand the belt system

## Height-adjustable headrest with integrated harness

Offers simple, individual adjustment for the growing child, thus providing them with an ergonomic sitting position

## Energy-absorbing shell

In the event of a collision, the energy is diverted through the shell and absorbed there

## Comfort seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

## Storable support leg

Easy to adjust it improves stability and can be easily stored in the base when not in use

## 360° rotation

This relieves the parents' backs when inserting and removing the child and brings the child into the optimum sitting position

# SALIA 125 KID

## THAT'S WHY

### LONG USAGE PERIOD

The Salia 125 Kid impresses with a long period of use - suitable from 3 months up to 7 years (61-125 cm). The height-adjustable headrest adapts perfectly to the height of the children and automatically grows as they do.

### 360 DEGREE ROTATION

The seat can be easily rotated 360 degrees. So you can quickly strap the child and then turn the seat back to its original required driving position.

### AIR VENTILATION SYSTEM

Thanks to openings in the outer shell and mesh inserts in the seat cover, a continuous flow of air ensures particularly comfortable sitting.

### INTUITIVE INSTALLATION

The use of ISOFIX and load leg makes installation simple and ensures a stable and secure positioning of the child seat in the car. The three anchorage points keep the seat in position and absorb the energies acting on the child in the event of an accident.

### ONE-HANDED RECLINE

The seat has five recline positions. Whether the child is strapped with the integrated harness system or with the vehicle seat belt. The recline can be adjusted with only a single hand.

### ADVANCED SIDE PROTECTION

Simply fold out the integrated ASP protectors on the door side. In the event of a side collision, the energy absorbers reduce the force that would act upon the child.

The intuitive and central harness adjuster with HERO harness guide enables the child to be fastened into the seat securely and simply

## One-click installation with ISOFIX

Easy and secure one-click installation of the ISOFIX base without the vehicle's seat belt

# SALIA ELITE

## THAT'S WHY

### 2-IN-1 INNOVATION

Salia Elite combines an infant carrier with a child seat and thus combines all safety-relevant functions of both in one seat. The infant carrier of our safe all-rounder weighs only 2.9 kg, so you can carry it effortlessly and take your baby everywhere. And the little ones? They can lean back, relax and dream on.

### 360 DEGREE ROTATION

The seat can be turned a full 360 degrees with just a single hand. This allows you to quickly fasten the child and the seat is then turned back into its original position.

### I-SIZE

Rear-facing transport, in accordance with UN R129 for maximum safety, optimised side collision protection and the intuitive ISOFIX installation offer the maximum safety in the back seat. Children over 16 months, and more than 76 cm can also start to ride forward facing.

### ADVANCED SIDE PROTECTION

Simply fold out the integrated ASP protectors on the door side. In the event of a side collision, the energy absorbers reduce the force that would act upon the child. The combination of infant carrier, seat structure and retractable protectors offer triple protection from side collisions.

### AT A GLANCE INDICATORS

The clear visual indicators show you that everything is in order. Such as if the ISOFIX connectors or the support leg are installed correctly or if the child seat is positioned as it should be, whether forward or rear-facing. And when everything is green, you're ready to go.

### TRAVEL SYSTEM

Our special adapters let you quickly fit the Salia Elite infant carrier to RECARO strollers and buggies, creating a seamless Travel System.

# SALIA

The freedom  
to act

## Memory foam in the headrest

Comfortable for the child and particularly suitable to absorb the forces generated in the event of an impact or collision

## 5-point harness system

The intuitive and central harness adjuster enables the child to be fastened into the seat securely and simply

## Adjustable support leg

Easy to adjust in the vehicle and it improves stability

## Intuitive one-handed operation

All important functions can intuitively be operated one-handed for more flexibility

## One-handed adjustment

One-handed operation allows for a comfortable and flat resting position during the journey, facing away from the direction of traffic (5 positions)

## Air ventilation system

The passive air ventilation system makes extended sitting particularly comfortable while travelling

## Coated belt tongues

Reduces heating up in hot weather – thus preventing your baby's sensitive skin from getting hurt

## Patented HERO safety system

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping and simplifies the secure and easy fastening process

## Comfort seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

## One-click installation with ISOFIX

Easy and secure one-click installation of the ISOFIX base without the vehicle's seat belt

# SALIA

## THAT'S WHY

### HEIGHT-ADJUSTABLE HEADREST

Good posture is essential for growing children. The height-adjustable headrest and harness offer maximum seating comfort and support a healthy posture while the harness guide increases safety.

### NEWBORN INLAY

The extra soft newborn inlay has been designed to ensure your child is perfectly positioned in the child seat as comfortably as possible.

### AT A GLANCE INDICATORS

The clear visual indicators show you that everything is in order. Such as if the ISOFIX connectors or the support leg are installed correctly or if the child seat is positioned as it should be, whether forward or rear-facing.

### I-SIZE

Rear-facing transport, in accordance with UN R129 for maximum safety, optimised side collision protection and the intuitive ISOFIX installation offer the maximum safety in the back seat.

### 360 DEGREE ROTATION

The seat can be easily rotated a full 360 degrees, offering total freedom of action. This uncomplicated function allows you to quickly buckle your child in, but also unbuckle them, and the seat then can be rotated back to its original position. Easy on your back and nerves.

### ADVANCED SIDE PROTECTION

Simply fold out the integrated ASP protectors on the door side. In the event of a side collision, the energy absorbers reduce the force that would act upon the child.

# KIO

The easy  
access  
to comfort

## 5-point harness system

The intuitive and central harness adjuster enables the child to be fastened into the seat securely and simply

## Patented HERO safety system

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping and simplifies the secure and easy fastening process

## Comfort seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

## Memory foam in the headrest

Comfortable for the child it is designed to absorb forces resulting from a crash or collision

## i-Size

Rear-facing transport in accordance with UN R129 for maximum safety

## Coated belt tongues

Reduces heating up in hot weather – thus preventing your baby's sensitive skin from getting hurt

## Intuitive operation

All important functions can intuitively be operated one-handed

## Ergonomic design

Flat side bolsters enable the parents to place their child in an ergonomic position

## Height-adjustable headrest with integrated harness

Offers simple, individual adjustment for the growing child, thus providing them with an ergonomic sitting position

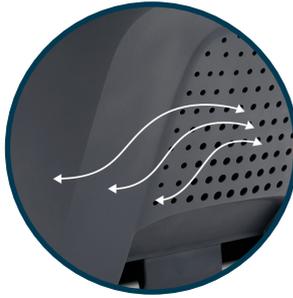

# KIO

## THAT'S WHY

### i-SIZE

For maximum safety: rear-facing transport according to UN R129. For optimized side impact protection and intuitive ISOFIX installation.

### AIR VENTILATION SYSTEM

Thanks to openings in the outer shell and mesh inserts in the seat cover, a continuous flow of air ensures particularly comfortable sitting.

### ADVANCED SIDE PROTECTION

Kio has integrated protectors that can be quickly folded out on the door side. In the event of a side collision, the energy absorbers reduce the force that would act upon the child.

### SMART HARNESS BUCKLE

When the baby is taken out of the carrier, the harness buckle tilts forward and stays in this position. Thus, the baby does not sit on the buckle when being placed in the carrier.

### ONE-HANDED ADJUSTMENT

The seat has five recline positions which can be adjusted with a single hand. The resting position is flat and gives the greatest comfort.

### MODULAR SYSTEM

The Kio reboarder can be installed on the Avan / Kio Base, in just a single click. The Base can be used in combination with the Avan infant carrier as the child right from birth.

# TORIA ELITE

The reliable  
safety expert

## Resting position

Relaxed sitting position thanks to adjustable seating angle (configuration 1/2/3)

## Integrated harness storage

Easy conversion to configuration 2/3 through the integrated harness storage with no need to expand the harness system

## Seat reducer

For an optimal ergonomic fit for smaller children (configuration 1)

## Advanced Side Protection (ASP)

Detachable protectors absorb the energy in the event of a side collision

## Comfort seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

## Coated belt tongues

Reduces heating up in hot weather – thus preventing your child's sensitive skin from getting hurt (configuration 1)

## 5-point harness system

The intuitive and central harness adjuster enables the child to be fastened into the seat securely and simply (configuration 1)

## Marked belt guide

The correct installation is facilitated by green belt guide markings

## Top-Tether

It provides additional stability and safety

## Integrated ISOFIX connectors

Simply fasten the child seat into the car using integrated ISOFIX connectors (configuration 1/2/3)

# TORIA ELITE

## THAT'S WHY

### GROWS WITH THE CHILD

It can be used for a 15-month old toddler to a 12-year old child. The height-adjustable backrest and headrest adapt in 14 positions to suit the height of the children and automatically grow as they do.

### ADVANCED SIDE PROTECTION

The detachable protectors can be fixed quickly and simply to the child seat. In the event of a side collision, the energy absorbers reduce the force that would act upon the child and provide maximum protection.

### AIR VENTILATION SYSTEM

The air ventilation system makes sitting over long periods particularly comfortable, and this is ensured by openings in the outer shell and mesh inserts in the seat cover, which allow continuous air flow.

### ONE-HANDED RECLINE

The child seat has five reclining positions, whether the child is strapped in with the integrated harness system or with the vehicle's seat belt. You can adjust the recline with just a single hand.

### SOUND SYSTEM

The speakers are built into the head area of the child seat. Thanks to audio connection and device pouch your children are entertained, can lean back and relax while their head remains protected by the headrest (Prime only).

### INTUITIVE INSTALLATION

ISOFIX and Top-Tether ensure easy handling and of course meet the strict requirements of the current i-Size safety standard. The three anchor points hold the seat in position and in the event of an accident, this absorbs the forces acting on the child.

# MAKO ELITE 2

The extra  
slim seat

## Extendable legrest

Can be adapted to your child's size and provides optimal support

## i-Size

Tested and approved in accordance with UN R129 for maximum safety

## ISOFIX connectors

Quick and secure placement and optimal stabilisation of the child seat in the vehicle

## Advanced Side Protection (ASP)

Protective side wings with integrated ASP system absorb the force in the event of a side collision

## Resting position

Relaxed sitting position thanks to the adjustable seating angle

## Extendable leg rest

Can be adapted to suit the height of your child and provides optimal support

## Comfort seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

## Adaptive backrest

The backrest follows the contours of your vehicle's seats

# MAKO ELITE 2

## THAT'S WHY

### ADVANCED SIDE PROTECTION

The detachable protectors can be fixed quickly and simply to the child seat. In the event of a side collision, the energy absorbers reduce the force that would act upon the child and provide maximum protection.

### AIR VENTILATION SYSTEM

Thanks to openings in the outer shell and mesh inserts in the seat cover, a continuous flow of air ensures particularly comfortable sitting.

### HEIGHT ADJUSTABLE

#### HEADREST

The headrest has 11 different settings to adjust the seating position to suit children from the age of 3.5 to 12 years.

### ISOFIX

Parents benefit from simple and secure installation thanks to ISOFIX connectors. The child seat is compatible with all vehicle seats bearing the i-Size logo and virtually all other seating with ISOFIX connectors.

### SMART PROTECTION WINGS

Padded wings at shoulder height automatically adjust to the child's body size. The Smart Protection Wings grow with the child thanks to the adjustable backrest - up to 12 years or a height of 150 cm.

### SOUND SYSTEM

The speakers are built into the head area of the child seat. Thanks to audio connection and device pouch your children are entertained, can lean back and relax while their head remains protected by the headrest.

Comfort on a new level

## Resting position

Relaxed sitting position thanks to the adjustable seating angle

## Height-adjustable headrest

Offers simple, individual adjustment for the growing child and facilitates an ergonomic sitting position

## i-Size

Tested and approved in accordance with UN R129 for maximum safety

## Comfort seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

## Advanced Side Protection (ASP)

Protective side wings with integrated ASP system absorb the force in the event of a side collision

## Shoulder protectors

Provide support and ensure maximum safety in the event of a side collision

## Adaptive backrest

Backrest follows the contours of your vehicle's seats

## ISOFIX connectors

Quick and secure placement and optimal stabilisation of the child seat in the vehicle

# MAKO 2

## THAT'S WHY

### ADVANCED SIDE PROTECTION

The integrated protectors offer maximum protection. In the event of a side collision, they absorb the force that would act upon the child.

### HEIGHT ADJUSTABLE

#### HEADREST

The height adjustable headrest offers simple, individual adjustments for the growing child and facilitates an ergonomic sitting position.

### COMFORT SEATING FOAM

Inspired by the automotive industry, our comfort seating foam adapts to your child's body shape perfectly and provides the highest level of comfort. Just take a seat and feel good.

### i-SIZE

Parents benefit from simple and secure installation thanks to ISOFIX connectors. The child seat is compatible with all vehicle seats bearing the i-Size logo and virtually all other seating with ISOFIX connectors.

### ADAPTIVE BACKREST

The backrest follows the contours of your vehicle's seats.

### RESTING POSITION

The adjustable seat angle gives the child a relaxed sitting position, so that every trip is pleasant. Because a journey can be many things, but should never be tiring, neither for you nor for your children.

# MONZA CFX

The compact  
and flexible  
hero

## **Foldable**

Easy to fold and takes up little space

## **Height-adjustable headrest**

Offers simple, individual adjustment for the growing child and facilitates an ergonomic sitting position

## **Portable**

Thanks to a smart integrated handle

## **Comfort seating foam**

Perfectly adapts to your child's body shape and provides the highest level of comfort

## **Advanced Side Protection (ASP)**

Protective side wings with integrated ASP system absorb the force in the event of a side collision

## **Moveable side wings**

The interior space automatically expands and adapts to the child's body size

## **Adaptive backrest**

Backrest follows the contours of your vehicle's seats

## **ISOFIX connectors**

Quick and secure placement and optimal stabilisation of the child seat in the vehicle

# MONZA CFX

## THAT'S WHY

### FOLDABLE

If the seat is transported outside the car or in the boot, the backrest can be folded flat onto the seat surface, taking up very little space.

### PORTABLE

A smart handle is integrated at the back of the shell.

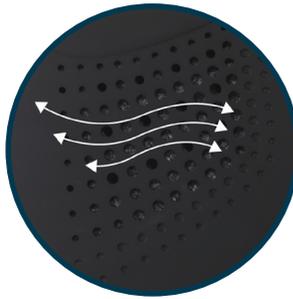

### GROWING

The seat can be used for a three-and-half-year-old toddler up to a twelve-year-old child. The headrest grows with the child and the shoulder wings offer enough space.

### ADVANCED SIDE PROTECTION

The detachable protectors can be fixed quickly and simply to the child seat. In the event of a side collision, the energy absorbers reduce the force that would act upon the child and provide maximum protection. The protectors should always be installed on the door side.

### AIR VENTILATION SYSTEM

Thanks to openings in the outer shell and mesh inserts in the seat cover, a continuous flow of air ensures particularly comfortable sitting.

### MOVABLE SIDE WINGS

To offer the growing child sufficient space without compromising safety, the shoulder wings of the Monza CFX are movable. This means that the interior space automatically expands and adapts to the child's body size.

# STROLLERS & BUGGIES

## STROLLERS

Birth - 4 years

Comfort and flexibility for all terrain lovers.

## BUGGIES

Birth - 4 years

Compact and lightweight for urban explorers.

# SADENA & CELONA

## YOU HAVE THE CHOICE – CHOOSE YOUR FAVOURITE

Individually mobile – anywhere, on any path. RECARO's products make it possible. Our strollers Sadena and Celona can adapt to your family's needs. With the 4-in-1 Travel System consisting of the Sadena/Celona Seat Unit, Carry Cot, Light Cot and RECARO infant carriers your family will have the right partner for every situation – whether you're on a long journey of discovery or just enjoying a leisurely stroll through town.

Freely configurable.

True freedom means having something that really suits you in every situation. That's why we thought beyond when we developed the Sadena and Celona comfort strollers and created a 4-in-1 Travel System. Sadena or Celona - choose a frame according to your personal preferences and combine it with the matching Sadena/Celona Seat Unit, Carry Cot, Light Cot or the RECARO infant carriers. You like it colourful? Mix and match the colors of individual components as you like it best.

# SADENA/ CELONA

## YOU HAVE THE CHOICE – CHOOSE YOUR FAVOURITE

With this comfortable seat unit, it's up to you: your little one can either sit facing you or - if there's a lot to explore - facing forward to keep an eye on the big picture. It's also possible to lay the seat completely flat for ergonomic and comfortable reclining. The matching carry cot is perfect for your newborn, so that your baby is well and safely cushioned. Or you can choose the light cot, which can be easily attached to the seat unit and protects the newborn like in a cocoon, while the older ones can enjoy it as a cuddly footmuff. The necessary adapters for combination with RECARO infant carriers are included. There are no limits to your mobility.

### SADENA

- + Thanks to compact dimensions, easy to manoeuvre and super agile
- + Due to its narrow wheelbase, the Sadena is practically made for public transport
- + Ideal for the urban environment thanks to its lightweight and compact folding dimensions
- + High-quality frame and first-class chassis provide maximum comfort on all journeys

### CELONA

- + High level of comfort due to its large, spring-mounted wheels
- + The large shopping basket offers enough space for baby bottles, nappies and much more
- + Due to its high sitting position, the Celona is the ideal replacement for a high chair
- + Particularly ergonomic for all body sizes of parents thanks to the wide range of adjustment of the handle

# SADENA FRAME

Slim shape,  
great agility

## Adjustable handle

Can be ergonomically adjusted to any body size with three settings

## Reflectors

Improved visibility for more safety in the metropolitan jungle and in low light conditions

## Large shopping basket

Easily accessible large shopping basket with up to 5 kg capacity

## Swivelling front wheels

Simple manoeuvring thanks to lockable 360 degree swivelling wheels

## Detachable wheels

For an even more compact folded form

## Flip-flop brakes

Brakes can be operated with all types of shoes or barefoot

## Puncture-proof wheels

The maintenance-free, foam-filled wheels are easy to look after and can take on any terrain, be it asphalt, gravel or park paths

## Additional accessories

With the adapters supplied with the product, you can transform the Sadena and the RECARO infant carriers into a Travel System

## Full suspension

Highly comfortable chassis ensures extremely smooth gliding across any surface

## Light wheels

The four smooth running wheels are ideal for use in an urban environment

# SADENA FRAME

## THAT'S WHY

### PERFECT FROM DAY ONE

Even for a newborn, the back- and leg-rest can be adjusted with just one hand to achieve a flat and ergonomic position. The seat unit can be adjusted forward and rearward.

### ONE-HANDED FOLDING

It can be folded away simply with just one hand with the seat unit facing forward or rearward. When closed and self-standing it's so compact at only 54 x 35 x 66 cm.

### SMART HARNESS SYSTEM

The shoulder pads and crotch pad spring outwards and stay open making it very easy for parents to position their child. Similarly, the magnetic harness buckle fastens quickly once the child is sitting comfortably. Pretty smart, don't you think?

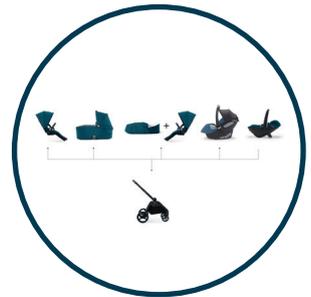

### HEIGHT-ADJUSTABLE HEADREST

The headrest can be adjusted to the child's height with just one hand, which keeps the child in a perfect position. Ergonomic padding in the head area offers additional comfort and prevents the head from slipping to one side while the child sleeps.

### FULL SUSPENSION

No matter which route you take, with full suspension on the front and rear wheels, the Sadena travels effortlessly and comfortably over any uneven terrain. We will allow nothing to stop you from reaching your destination.

### 4-IN-1 TRAVEL SYSTEM

Sadena has a narrow wheelbase, so it can handle even the trickiest city passages with ease. Whether on the subway or in a small boutique, no path is inaccessible, making the Sadena just the right choice for the urban environment. Closed and self-standing, it is even more compact at only 54 x 35 x 66 cm.

# SADENA/ CELONA SEAT UNIT

## Extra comfort

### From day one

The back and leg rest can be adjusted with just one hand to provide a flat and ergonomic lying position. This means that the Seat Unit can be used from birth

### Reversible seat unit

Can be installed in the stroller facing towards and away from the direction of travel

### XXL sun canopy

The extra large extendable sun canopy with UPF 50 offers protection from sun, wind and bad weather

### Bumper bar

Can be turned to one side and opened on both sides to aid placing the child in the buggy

### Air ventilation system

Smart openings in the outer shell and mesh inserts in the seat cover allow for continuous air circulation

### Smart 5-points-harness system

Buckling your child in is easy thanks to the harness buckle and shoulder straps that spring forward and stay open when the child is not in the stroller

### Patented hero safety system

Buckling your child in is easy thanks to the harness buckle and shoulder straps that spring forward and stay open when the child is not in the stroller

# SADENA/ CELONA LIGHT COT

## More than a footmuff

### 2-in-1 travel solution

Usable up to max. 6 months as a lightweight newborn cot, later as a cosy footmuff

### Cocoon protection

Water-repellent outer material and cosy inner fabric beat wind, cold and rain

### Foldable with the stroller

Due to it's weight and special fabric, no need to remove the light cot

### Dirt-repellent coating in the foot area

Wipeable material allows easy cleaning despite dirty child's shoes

### Spacious mattress with soft cover

Comfortable and ergonomic resting

### Growing footmuff

The size can be extended for larger children

### Easy attachment and removal

Openings for 5-point harness and elastic straps ensure simple handling

# LEXA ELITE

The uncompromising all-rounder

## Peakaboo window

The viewing window ensures optimal air circulation and a clear view of the child

## Adjustable legrest

Supports for an optimal position to lie in the stroller.

## Carry strap

Practical carrying aid for transport

## Height-adjustable sun canopy

As a protection from wind and weather, it grows with the child and can be optimally adjusted in position

## Large shopping basket

Easily accessible large shopping basket

## Swivelling front wheels

Simple manoeuvring thanks to lockable 360 degree swivelling wheels

## Detachable wheels

For an even more compact folded form

## Flip-flop brakes

Brakes can be operated with all types of shoes or barefoot

## Puncture-proof wheels

The maintenance-free, foam-filled wheels are easy to look after and can take on any terrain, be it asphalt, gravel or park paths

## Rotable bumper bar

Swivels for easy insertion of the child and safe sitting during the ride

## 5-point-harness with magnetic buckle

With additional shoulder and crotch pads - made of soft material for extra comfort and magnetic buckles for easy fastening

## Full suspension

Highly comfortable chassis ensures extremely smooth gliding across any surface

## Light wheels

The four smooth running wheels are ideal for use in an urban environment

# LEXA ELITE

## THAT'S WHY

### LEIGHTWEIGHT

Thanks to its lightweight of approx. 8 kg, the compact buggy is wonderfully easy to steer and very easy to carry or stow away.

### EXTRA SMALL FOLDED

With its practical one-hand folding mechanism it folds to a very compact size and fits even into small spaces. For effortless transport and storage.

### RECLINING POSITION

You can set up a flat reclining position for a little one or various sitting positions for older children.

### COMFORT CHASSIS

The four-wheel suspension and highly comfortable chassis compensate for uneven ground. Easy maneuvering thanks to lockable 360° swivel wheels provides a smooth ride and as much agility as needed.

### TRAVEL SYSTEM

Thanks to the Travel System and the RECARO infant carriers your family will have the right partner for every situation. Our products are a harmonious mix of design and functionality, comfort and practicality.

### REVERSIBLE SEAT UNIT

The seat unit can be changed from forward to rearward-facing and back again with a simple flick of the wrist. Whether the little one is sleeping deeply or sitting up, wide awake and exploring the world, it's just comfortable.

# EASYLIFE ELITE 2

The all-rounder  
which does it all

## Viewing window in sun canopy

Net ensures optimal air circulation and parents always have the child in sight

## Reflectors

Improved visibility for more safety in the metropolitan jungle in low light conditions

## Bumper bar

Can be turned to one side and opened on both sides to aid placing the child in the buggy

## Detachable wheels

For an even more compact folded form

## Swivelling front wheels

Simple manoeuvring thanks to lockable 360 degree swivelling wheels

## Flip-flop brakes

Brakes can be operated with all types of shoes or barefoot

## Universal handle

For greater agility the buggy can be pushed and steered through the city one-handed

## 5-point harness system

With additional shoulder and crotch pads – soft material for extra comfort

## Puncture-proof wheels

The maintenance-free, foam-filled wheels are easy to look after and can take on any terrain, be it asphalt, gravel or park paths

## Extra large shopping basket

Easily accessible extra large shopping basket with up to 5 kg capacity

# EASYLIFE ELITE 2

## THAT'S WHY

### ONE-HANDED FOLDING

The EasyLife Elite 2 folds easily and quickly with just one hand. It is self-standing and folds up as compactly as possible, taking up little space in the trunk.

### ERGONOMIC RECLINING

The adjustable back- and legrest make the journey more comfortable for your child. You can set up a flat reclining position for your newborn or various sitting positions for your older child.

### EXTRA LARGE SUN CANOPY

The extra large sun canopy with UPF 50 sun protection and the extendable sun visor shield your child's sensitive skin, from wind and UV radiation.

### AIR VENTILATION SYSTEM

Our passive air ventilation system, which consists of mesh inserts on the sides of the seat cover to allow good air circulation, makes longer sitting in the stroller really comfortable.

### COMFORT INLAY

The extra soft high-quality comfort inlay is an optimal feature: it ensures your newborn is perfectly positioned and comfortable in the buggy right from the earliest days.

### TRAVEL SYSTEM

Our adapters enable a quick change from car to buggy for the RECARO infant carriers, creating a seamless Travel System that makes moving around with children much less stressful and far more enjoyable.
